

Comprehensive Report: Global Lottery Games and API Data Providers

1. Introduction

This report provides a comprehensive overview of lottery games and available API data providers across the Dominican Republic, Spain, Venezuela, Puerto Rico, and global markets. The objective is to identify key lottery operators, their popular games, and the methods for programmatic access to real-time results and historical data, including API keys, documentation, and open-source solutions.

2. Dominican Republic Lotteries

The Dominican Republic features a dynamic lottery landscape with several major operators offering a variety of daily and weekly games ¹.

Major Operators and Games:

- **Lotería Nacional:** Gana Más, Lotería Nacional Noche, Billetes y Quinielas.
- **LEIDSA:** Loto - Loto Más - Loto Super Más, Quiniela Leidsa, Pega 3 Más, Loto Pool, Super Kino TV.
- **Lotería Real:** Loto Real, Quiniela Real, Quinielita Real, Pega 4 Real.
- **Loteka:** Quiniela Loteka, Mega Lotto, El Extra.
- **La Primera:** Quiniela La Primera (Día and Noche), Loto 5 Más.
- **LoteDom:** Quiniela LoteDom, Agarrate 4, El Quemaito Mayor.
- **La Suerte Dominicana:** Quiniela La Suerte (12:30 PM and 6:00 PM).
- **External Lotteries (Played in DR):** New York Lottery, Florida Lottery, Anguila Lottery, King Lottery.

API Access for Dominican Republic Lotteries:

Access to real-time data for Dominican lotteries is primarily available through commercial providers or self-hosted scraping solutions.

Provider	Type	Access Method	Notes
----------	------	---------------	-------

Downtack	Commercial API	Contact for pricing and API key	Offers JSON, XML, CSV formats; covers major DR lotteries ² .
Sorteos RD	Commercial API	Contact via Facebook for details	Integrates +37 daily draws with real-time updates ³ .
LotteryScraping-RD	Open Source (Python)	Self-hosted web scraping	Extracts data from loteriasdominicanas.com ; provides JSON output ⁴ .

3. Spain Lotteries

Spain's lottery system is managed by SELAE (Sociedad Estatal de Loterías y Apuestas del Estado) and includes several popular national and European games.

Major Games:

- **EuroMillions**
- **La Primitiva**
- **Bonoloto**
- **El Gordo**
- **Lotería Nacional** (including Christmas draw)
- **Eurodreams**
- **La Quiniela**
- **Quinigol**
- **Lototurf**
- **Quíntuple Plus**

API Access for Spain Lotteries:

Loteria API is a dedicated provider for Spanish lottery data ⁵ .

Provider	Type	Access Method	Notes
Loteria API	Commercial API	Free Tier (1,000 requests/month) available upon	Provides real-time JSON results and historical data for all

		registration; paid plans for higher usage.	SELAE-managed lotteries ⁵ .
--	--	--	--

4. Venezuela Lotteries

Venezuela's lottery market is characterized by a mix of traditional and unique "animalito" (animal-themed) draws.

Major Games:

- **Lotto Activo**
- **La Granjita**
- **Triple Chance**
- **Triple Gordo**
- **Triple Zulia**
- **Triple Caracas**
- **Triple Tachira**

API Access for Venezuela Lotteries:

Direct commercial APIs for Venezuelan lotteries are less common. Self-hosted solutions are often utilized.

Provider	Type	Access Method	Notes
Loteria-Venezuela	Open Source (GitHub)	Self-hosted mobile application code	Extracts results from main national draws; requires development to integrate as an API ⁶ .
LoteriaDeHoy / TuAzar	Web Portals	Web scraping (no official API)	Provide results on their websites, but no public API is offered ⁷ ⁸ .

5. Puerto Rico Lotteries

Puerto Rico operates both traditional and electronic lottery games.

Major Games:

- Pega 2
- Pega 3
- Pega 4
- Loto Cash
- Revancha
- Powerball (multi-jurisdictional)

API Access for Puerto Rico Lotteries:

Official public APIs are not readily available from the government. Third-party aggregators or custom scraping are common.

Provider	Type	Access Method	Notes
Loterías de Puerto Rico	Official Website	No public API	Provides results directly on their official website 9.
Jackpocket	Commercial API (via RapidAPI)	Paid subscription	Aggregates results for various US lotteries, including Puerto Rico 10.

6. Global Lottery API Aggregators

For comprehensive worldwide lottery data, several platforms offer aggregated API services.

Provider	Coverage	Access Method	Notes
New Lotto API	846 lotteries in 70+ countries	Paid via RapidAPI	Offers real-time results, jackpot info, next draw dates, and draw videos 11.
Magayo	450+ lotteries in 75+ countries	Free Tier available; contact for API key	Provides lottery data feeds and number generator APIs 12.

APIVerve	Global (Powerball, Mega Millions, EuroMillions, Canada Lotto Max)	Free Trial API key available on dashboard	Simple REST API for winning numbers 13 .
CollectAPI	Turkey, USA (Powerball)	Free endpoints available	Limited global coverage, primarily focuses on specific regions 14 .

7. Summary of API Providers and Access Methods

Region	Recommended Provider	API Type	Access Method	Key Features
Dominican Republic	Downtack / Sorteos RD	Commercial	Contact for pricing/key	Real-time, multiple formats (JSON, XML, CSV)
Spain	Loteria API	Commercial (Free Tier)	Register for Free Tier API key	Real-time JSON, historical data, all SELAE games
Venezuela	Lottery-Venezuela (GitHub)	Open Source	Self-hosted (Python)	Requires technical setup, scrapes web data
Puerto Rico	Jackpocket (via RapidAPI)	Commercial	Paid subscription	Aggregated US lottery data, including PR
Global / All	New Lotto API (via RapidAPI)	Commercial	Paid subscription	846 lotteries, 70+ countries, real-time, videos
Global / All	Magayo	Commercial (Free Tier)	Register for API key	450+ lotteries, 75+ countries, data feeds

8. Conclusion

Accessing real-time lottery data globally involves a mix of commercial APIs, open-source scraping tools, and direct website parsing. For a unified global solution, commercial

aggregators like **New Lotto API** (via RapidAPI) or **Magayo** offer extensive coverage, though often requiring a paid subscription or registration for a free tier. For specific regions like the Dominican Republic and Spain, dedicated providers offer tailored services. Venezuela and Puerto Rico may require more custom solutions or reliance on broader US-focused APIs for their respective games.

Developers should evaluate their specific needs regarding coverage, real-time updates, data format, and budget to choose the most suitable API solution. For quick prototyping or personal projects, open-source scraping tools can be a viable starting point.
